

Yalçıncañ Ulus

Full-Stack Developer

✉ yalcincan.ulus@gmail.com 📍 Türkiye 🌐 ulus.uk [in](https://www.linkedin.com/in/yalcincan) [yalcincan](https://www.linkedin.com/in/yalcincan) [github/yalcincanulus](https://github.com/yalcincanulus)

Summary

Systems-focused Full-Stack Developer with expertise in React, TypeScript, Node.js, and modern runtimes like Bun. Experienced in architecting complex monorepos, data-heavy decoupled architectures, and real-time interactive systems. Combines strong foundational engineering principles with modern AI tooling to accelerate development cycles and rapidly deliver features without compromising code quality. Passionate about end-to-end type safety, robust database design, and streamlined DevOps via Docker and automated CI/CD.

Skills

- **Languages:** TypeScript, JavaScript, Go, Python, HTML/CSS
- **Frameworks & Libraries:** React, Node.js, Express, Bun, Tailwind CSS, Drizzle ORM, WebSockets
- **Databases & Caching:** PostgreSQL, Redis, MongoDB, TimescaleDB, SQLite, BullMQ
- **Tools & DevOps:** Docker, Linux, Git, Turborepo, AWS S3, Monorepos

Projects

Automated Price Tracking Platform | TypeScript, React, Node.js/Bun, TimescaleDB, Redis, BullMQ, Turborepo, Docker, Sentry, Typesense (Elasticsearch alt.)

- Built a distributed data-ingestion pipeline using **BullMQ** and **Redis** to scale web scraping and price synchronization.
- Designed a TimescaleDB (**PostgreSQL**) time-series database optimized for querying millions of historical price records.
- Developed a **React/TypeScript** chart UI and deployed the multi-container app on a **Linux VPS** using **Docker** Compose.

[Github Repository](#)

Social Media Platform | TypeScript, React, Node.js/Bun, PostgreSQL, Redis, Turborepo, Docker

- Engineered a full-stack monorepo using **Turborepo**, ensuring strict type-safety from the **Node.js** API to the **React** UI.
- Integrated **PostgreSQL** (Drizzle ORM), **WebSockets** for live notifications, **Redis** caching, and **S3** media storage.
- Orchestrated containerized deployments and **multi-stage builds** on a **Linux VPS** utilizing **Docker Compose**.

Experience

Freelance Client (Restaurant Industry)

Siem Reap, KH (Remote)

Frontend Developer

May 2024

- Developed a responsive, mobile-first restaurant menu application using **React**, **TypeScript**, and **Tailwind CSS**.
- Implemented fast client-side routing and dynamic category navigation, deploying the final product to static hosting.

Education

Istanbul Technical University | Earthquake Engineering (MSc.)

Sakarya University | Civil Engineering (BSc.)

Languages

English (Professional/Full Proficiency), Turkish (Native)
